

Application for support: Protective wall for Kikambala village, Kenya

Dear Sir or Madam

We hereby send you the annuale financial statements 2010. Our aim is to finish the protective wall in Kikambala in Kilifi Distric, Kenya this year. Thus we could start building the carpenter's shop. The machinery for the shop were provided by the Kanton Basel-Stadt.

Application criteria:

Responsibilities

Please refer to the attached annual report 2009/2010.

Sustainability:

1. Of importance for the association "Kinder in Kenia" (Children in Kenya) are:

- involvement of the local population
- forward-looking projects and sutainable development
- educational measures
- family-planning and hygiene

We do not want to give anything away for free, but help others to help themselves. Young people have to learn and work within our projects to keep their employment.

2. Project proptective wall

After 16 years of ongoing thefts on our premises in Kikambala, we had to take the decision to protect our project farm by building a wall.

This protective wall will make illegal entrance to the premises considerably difficult and will make guarding the area easier. Not only will it protect equipment and machinery, especially of the carpenter's and tailor's shops, but it will also give the women and adolescents on the premises a feeling of safety.

The wall will be 427 metres total in length, 2.10 metres in height plus foundations of 90 centimetres. Furthermore, there will be a 7 metres wide gate.

The building of the wall is coordinated and supervised by the local project management. Additionally, Miss Grene Schait-Maleko will visit the village on demand to ensure that the donations in their entirety are used for the project.

The total costs for building the wall amount to 3 100 000 Kenyan shillings. This roughly translates to 45 000 Swiss francs (Oanda exchange rate, 20.04.2010).

One brick costs CHF 1.-

320 metres of the total 427 metres of the wall's length have already been finished. The project is in need of another CHF 16 000 in order to successfully complete the building of the protective wall.

Calculation of costs for protective wall

	CHF	KSH	Exchange rate	Date of exchange rate	Metres	Metres (per cent)
Total costs	45'000	3'100'000	68.89	21.04.2010	427	100%
Paid costs	32'974	1'860'000	56.41		320	75%
Remaining costs	12'026	1'240'000	103.11	06.07.2011	107	25%

Remaining costs for the building of the protective wall: CHF 12 026.00.

Please support the completion of this important project by buying symbolic bricks.
We will send you a certificate indicating the number of bricks you paid for.

Annual reports

Please refer to the attached annual report 2009/2010.
